

# April 27-28, 2023 DQA Conference:

## *Moving Past Disruption to Improve Oral Healthcare*

**Description:** This conference will focus on moving past the disruption of the past few years and highlight innovative leadership and concrete strategies being deployed in the oral healthcare system. Learn about the various elements that comprise a quality improvement system – leadership, staff training, coding systems, evidence-based dentistry, medical-dental integration – and how they address value, cost and quality in the delivery of oral healthcare and impact patient outcomes.

### **Learning Objectives – by the end of this conference, participants will....**

1. Recognize the key elements within oral healthcare that drive quality improvement.
2. Describe how individual oral healthcare improvement elements can work in tandem.
3. Identify at least one improvement element that could be adapted to build improvement capability.

### **Program**
